

Atmel SAM4E Series

ARM Cortex-M4 Processor-Based Devices for Industrial Automation and Building Control Applications

The Atmel® SAM4E family delivers a rich set of advanced connectivity peripherals and a floating point unit (FPU). Based on the 32-bit ARM® Cortex™-M4 processor, SAM4E devices operate up to 120MHz and offer up to 1024KB of Flash, 2KB of cache memory and up to 128KB of SRAM. The family further extends Atmel's growing portfolio of ARM processor-based devices.

The SAM4E family offers a rich set of advanced connectivity peripherals such as a 10/100Mbps Ethernet MAC supporting IEEE 1588 and dual CAN. With a single-precision FPU, advanced analog features as well as a full set of timing and control functions, SAM4E MCUs are ideal for industrial automation, home and building control, machine-to-machine communications, automotive aftermarket and energy management applications.

- **High Performance**
 - ARM Cortex-M4 processor running at 120MHz
 - Floating point unit
 - 2KB cache providing zero wait state flash access at full speed
- **Connectivity**
 - 10/100 Ethernet MAC, supporting IEEE 1588
 - Dual CAN
 - USB 2.0
- **Advanced Analog**
 - Two 16-bit analog-to-digital converters (ADCs) with up to 24 channels
 - Programmable gain amplifier
 - Offset error correction
 - Gain error correction
- **Real Time Event**
 - No CPU intervention
 - No latency

SAM4E Key Features	
Frequency	120MHz
Flash	512KB - 1MB
SRAM	128KB
EMAC	1
USB	FS Device
CAN	2
USART	4
MCI/SDIO	Yes
Ext Bus Interface	Yes
SPI	3
I ² C	2
Crypto	AES
Parallel Capture (CMOS int.)	Yes
2x16-bit ADC	Up to 24 Channels
12-bit DAC	Up to 2 Channels
Timers/ PWMs	9/4
GPIO	Up to 117
Pin Count	100 - 144
Package	QFP, BGA

Key Applications

- **Industrial Automation and Machine-to-Machine**
 - Programmable logic controllers
 - Drive control
 - Robotics
- **Building and Home Control**
 - Concentrator
 - Access control
 - Control panels
 - Room control unit
- **Energy Management**
 - Power supplies communication
 - Switch breakers communication
 - Inverters communication
- **Automotive Aftermarket**
 - Fleet management
 - Telematics

Faster Development with Integrated Platform

As with all of Atmel's AVR® and ARM Cortex-M processor-based devices, the SAM4E family is supported by the Atmel Studio 6 integrated development platform (IDP). Available as a free download, Atmel Studio 6 includes the Atmel Software Framework, a complete library of source code, project examples, drivers and stacks. The IDP also features the Atmel Gallery apps store for embedded tools and extensions and the Atmel Spaces collaborative workspace for software and hardware projects based on Atmel microcontrollers.

Head Start on Your Designs

Get a fast start on your designs with the SAM4E-EK evaluation kit, featuring a SAM4E 16EA microcontroller. The SAM4E-EK board is based on the integration of an ARM Cortex-M4 processor with on-board NAND Flash and a set of popular peripherals. It is designed to provide a high-performance, highly flexible processor evaluation platform for a wide range of applications.
