WATER INDICATING TAPES

Electronics today are being built more durable than ever; they are designed to withstand more impact than past generations and new protection products help prevent scratches and surface damage.

Despite the recent advances in electronics and protection products, water is still a threat to their performance. 3M Water Contact Indicator Tapes help manufacturers, service providers, and repair technicians determine if malfunction is under warranty or due to a water intrusion.

Devices That Contain Water Indicating Tapes

- Medical Devices
- Desktop Computers
- Laptops
- Computer Accessories
- PCB Cards
- Cell Phones
- Tablets

Product Benefits

- Fast and accurate detection
- Tape turns from white to red upon direct water contact
- Highly resistant to temperature and humidity
- Red color is irreversible after drying
- Slim design
- Acrylic adhesive provides a high strength bond
